## Custom Tuning Form

### Motorvation Custom Tuning Form

The main difference between "Race Winning Tuning" and "Bench Tuning" is "Real World Results"! There are no substitutes for real world performance results. They are based on fact, not theory. The kind of facts that show up in race wins. Not every bench idea, no matter if it is dyno-tested, translates to on the track success. There are variables that exist at the track that can only be tested, "where the rubber meets the road". MotorVation's "Race Winning Tuning" is performed by winning racers in actual competition. Nothing beats a win light and a time slip to back it up. Don't be left, "on the bench".

#### Breaking News

#### Our Latest Videos

MotorVation Race Winning Tuning is not an off-the-shelf cookie-cutter performance chip. Each chip/module is designed to optimize the performance of your engine when using other aftermarket products. MotorVation employees have over 50 years combined experience in working with the new computer-controlled vehicles.

If you have made modifications to your engine such as heads, camshafts, large mass air flow sensors, intake manifolds, superchargers or nitrous systems, you should get custom tuning for your vehicle. This will insure that you get the maximum power gains from your added performance products. If the aftermarket product you purchased seems to give you less performance than you expected, it is probably because you need to tune your engine to get the product to do what it was designed to do by the manufacturer. For modifications such as high flow filters, cool air kits, or cat back and high flow muffler systems, you may use the MotorVation Stage 1 or Stage 2 performance chip to optimize the power of your engine. We recommend you use a 160-degree or 180-degree thermostat.

If you would like to know if MotorVation Custom Tuning is right for you, please fill out the form below or download the [PDF](#) version and fax to 1-866-821-0032. If you would like additional information about MotorVation Race Winning Tuning, please call our tech specialist at 1-901-309-3342 (available from M-TH from 8:30AM to 4:30PM (EST) or F from 8:30AM to 12:00PM (EST). MotorVation guarantees your satisfaction. Revitalize your engine with MotorVation products. If it isn't MotorVated, YOU lose!

**NOTE: All custom tuning chips are for off-road competition use only and may not be legal on pollution controlled vehicles!**
